PROGNOSIS:

DURATION OF TREATMENT WITH ORTHOPEDIC BRACE:

NECESSITY OF ANKLE/FOOT-ORTHOPEDIC BRACE MOLDED TO PATIENT MODEL:

A custom (versus pre-fabricated) ankle-foot-orthosis has been prescribed based upon the following criteria which are specific to the condition of this patient. (check all that apply):

- The patient could not be fit with a prefabricated AFO**
- The condition necessitating the orthosis is expected to be permanent or of longstanding duration (more than 6 months)**
- There is need to control the ankle or foot in more than one plane**
- The patient has documented neurological, circulatory, or orthopedic condition that requires custom fabrication over a model to prevent tissue injury**
- The patient has a healing fracture which lacks normal anatomical integrity or anthropometric proportions**

I hereby certify that the ankle-foot-orthosis described above is a rigid or semi-rigid device which is used for the purpose of supporting a weak or deformed body member or restricting or eliminating motion in a diseased or injured part of the body. It is designed to provide support and counterforce on the limb or body part that it is being braced.
